JSON API MySQL Nginx PHP5 Redis Sphinx SQL Symfony
Twitter Api Vkontakte Api Yii Configuring VPS / VDS servers phantomjs
Zephir Android SDK MongoDB ElasticSearch Supervisor Memcached
ООП Apache Tika PHP Linux

Further information

About me

Quality work, speed. I like to learn something new. I love my job. I have a strong desire to learn new languages (golang, erlang). I like high loads and optimize processes.

Portfolio contains just part of my works

I write sites from scratch, without cms (joomla, etc). Last 3 years i worked with Yii, Phalcon. I have an experience in mysql (percona) and mongodb. To caching I use "redis" and "memcache". if there is a demand in good searching, than i use "elasticsearch". I can pick up the servers (debian, ubuntu) and set up everything to complete sitework on the entire software.

I have an experience in developing mobile applications for android. Testing phpunit, selenium.

Also I worke in phpStorm and IntelliJ IDEA, use git (github, bitbucket), php 5.5 (Zend OPcache), php5 (PSR-2)

My latest works:

The last 2 years - fair-price.biz

I developed a websites, api, mobile application
